

GENESIS POOLS

A SPECTACULAR SPILLWAY

FAMILY FUN YEAR-ROUND

The owners of this property wanted a pool that could easily entertain, includes a wading pool for the grandchildren, and for both areas to be a feature that could be viewed from the home itself. Designed and built by Genesis Pools, this 8m x 8m pool ensures the family can enjoy ample poolside fun year-round.

The pool's curved spillway is certainly a key feature as it faces the house at a 45 degree angle, which creates different viewpoints as you walk along the veranda of the property. The spillway leading into the wading pool also acts as a feature wall, which creates a fantastic visual effect.

Founder and director of Genesis Pools, Brandon Appleton designed this pool himself, while using the owner's requirements to create a flawless design.

To accommodate the homeowners' requirements, Genesis Pools needed to build the pool in a way that makes it look like it was always there. The pool's placement utilises space by transforming a previously unused grassy slope into an entertainer's paradise.

Surfaced in a beautiful mix of white and blue tiles from Pool Tile Co, this pool is built to impress. The pool includes a 7-star Hurlco Viron P600 pump and a Baker Hydro sand filter, as well as Spa Electrics LED lights, which create an iridescent glow throughout the water, and an Evo heat pump, to ensure the water temperature is easily maintained.

The finished result is a well-designed pool that is ideal for families and entertaining, and is a true testament to the work for which Genesis Pools is renowned.
